### Where is the Complete Solution?

Human being is the only factor of present and future and human being is made by the bundle of biological and psychological units. Both are interrelated to each other to support and uphold his existence and becoming. The psychological factors of man manage his intelligence, sense of perception, analytical mind, activity, motor-sensory co-ordination, emotions, kindness, sympathy, love, oneness-feeling with the outer world, etc. But again that psychological depth is also founded on inner biological (genetic) setup.

The genetic constitution directs what kind of impulses he would receive from the environment and what he filters in favor of life? This genetic setup comes from the heredity and psychogenic compatibility of father and mother. This is Management of genetic evolution, which is controlled by Eugenics reform. But this significant psychological factor could be handled by other two ways (1) Attachment with man of wisdom or 'Initiation' (2) Nourishment of good instinctive characters or 'Education'. Social evolution sustains on Initiation, Education & Eugenics (IEE), three pillars of human life.

So, this is an urgent need of all to uphold IEE factors at individual, conjugal, social and global levels for our present existence and future evolution.

So *The Aryan*, an e-paper has come forward with a mission to reach out each individual of the globe to make them aware about these laws of existential-evolution.

So *The Aryan* seeks sincere support of the readers to touch every corner of the globe to be a part of this universal Man Making Mission (3M). You may join your hands by sharing this e-paper to your relatives and friends.

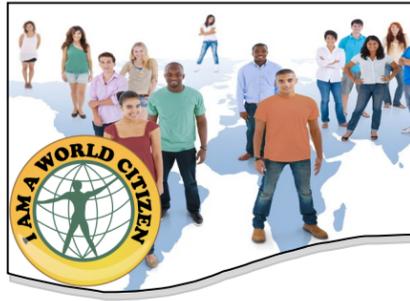

### 'Global Citizenship' : A step to save Socio-Environmental-Ecology (SEE)

Since 2012, millions of Global Citizens around the world have taken over six million actions to solve the world's biggest challenges. That's six million emails, tweets, petition signatures and phone calls targeting world leaders to end extreme poverty by 2030. To date, the actions by our global community along with the high level advocacy efforts and with different groups, have resulted in 130 commitments and policy announcements from leaders, including financial aid valued at over \$25.6 billion that is set to affect the lives of 656 million people. Most discussions, the global citizens movement is a socio-political process rather than a political organization or party structure. The term is often used synonymously with the anti-globalization movement or the global justice movement.

The concept of global citizenship first emerged among the Aryan sages thousands of years ago in Sanskrit words 'Vasudhaiva Kutumbakam' - means 'the whole world is my relative'. Albert Einstein considered himself a citizen of the world.

The idea that today's conditions have increased the latency for an emergent global civic identity. A global citizens movement rooted in social and

economic justice is emerging and is necessary for ending global poverty. In broad usage, the term global citizenship or world citizenship defines a person who places their identity with a "global community" above their identity as a citizen of a particular nation or place. The idea is that one's identity transcends geography or political borders and that the planetary human community is interdependent and whole humankind is essentially one. The term has been used in education and political philosophy and has enjoyed popular use in social movements such as the "World Citizen" movement.

At the UN general assembly in New York set of development goals was launched. These are called the sustainable development goals (SDGs). Also known as the Global Goals. More than 150 world leaders attended the summit to represent the 193 countries who signed up to achieve the goals towards: Poverty, Hunger, Health, Environment, Education for all, Global partnership.

It is time to come forward with a feeling of 'oneness' with mankind to protect and uphold our Socio-Environmental-Ecology (SEE).

### Aryanisation : A silent man making revolution

Individual is the building block of society. The incremental faculty of divinity in the psychic and mental constitution of an individual only brings about the social evolution. Aryanisation is a cultural movement of existential-becoming of each individual to uphold world humanity. The objective of this movement is to bring everyone under the fold of the culture of existence on the basis of one's own cultural heritage such as religion, belief, thought, practice, habit, instinct, etc. Under this program and action plan of Aryanisation, the fundamental principles of Aryan-existentialism can be enunciated by accepting Ideal's guidance or 'Initiation' and unfolding good instinct or 'Education' and following the law of grouping of cultural heredity or inner mechanism of Varnashram and eugenics or 'marriage reform'. These programs need to be popularized among each individual of the world by avoiding any kind of confrontation and hostility. This is not a political, communal or racial movement, but the movement of existence and evolution of the entire humanity.

Historically, thousands of years ago these facts of human existence were discovered for

the first time by some group of wise people called Aryan Seers. Later on, these facts were carried away by the next Aryan world teachers including Sree Krishna, Goutam Buddha, Jesus Christ, Hazrat Mohammad, Sree Chaitanya, Sree Ramakrishna, Sree Sree Anukulchandra, etc.

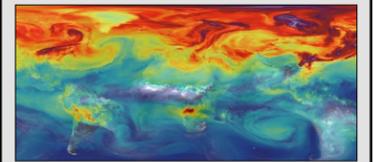

Aryanisation for Global Humanity

But unfortunately in the last century 'Aryanism' was blatantly misused by some fascist forces. However, by upholding this movement the existential culture will be transformed into social law. Then, this will be spread into the global sphere by conforming to the universal laws of becoming. This bio-psychic transformation of individuals is an inevitable process of 'silent revolution' of Aryanisation to be evolved into a divine world society i.e., Aryan communism - the destination of social evolution. Aryan communism is a global village of highly conscious people of Brahminic character who instinctively possess feeling of oneness in every object of the ecological system, and act to keep the balance of the existential-becoming of the whole system. Now this awareness has taken swing globally.

### National & International News

#### New era of Climate change !

It is making history as marking a new era of climate change reality with record high greenhouse gas concentrations. In 2015, levels of methane were 2.5 times greater than in the pre

-industrial era, while nitrous oxide was 1.2 times above the historic measure. Around 200 nations who signed the Paris climate agreement will meet in Morocco in November to decide on the next steps forward.

#### Will Central Asia fight over water?

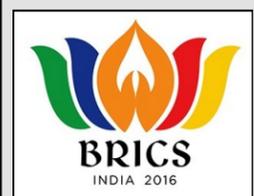

In Central Asia, a crisis is brewing over water and electricity. The Soviet-era system in which the five countries of the region shared their resources has broken down, leaving some fac-

ing water shortages and others chronic power cuts. Instances of small-scale unrest have already occurred, but some warn this could be just the beginning

#### India hosted 8th BRICS summit

India hosted the 8th BRICS (BRAZIL, RUSSIA, INDIA, CHINA & SOUTH AFRICA) Summit during its Chair-

manship which is scheduled to take place on 15 - 16

October 2016 in Goa. The theme of India's BRICS Chairmanship is Building Responsive, Inclusive and Collective Solutions. BRICS brings together five major emerging economies, comprising 43% of the world population, having 30% of the world GDP and 17% share in the world trade.
