Divine Global Communism

Our body system teaches us a very significant lesson. Different organs of a body have varieties of essential functions evolved from the single organic system (unicellular animal) due to urge of existential evolution for a better life.

Secondly a marvellous functional co-ordination has also been developed in-between these essentials varieties of organs, such as lungs, heart, kidney, brain, etc. And we observe - if any one of those organs falls in functional trouble - immediately rest of those organs together come forward for managing this crisis. This systematic organization works when all of the organs are well connected with the central or master organ i.e. brain. It is fact that head, hand, stomach, leg these four division of labour of body, work as a single unit when all unconditionally obey the commands of head (master mind). And quality of work depends upon the functional level of the brain.

Similarly society has also evolved along with a perfect network of division of labour (grouping of similar characters) based on hereditary-instinct of mankind. And the system is directed and co-ordinated by Master man as the head of the society.

This system not only develops the possibilities of maximum socio-economic output, scientific-n-technological development, family-based industrial growth and a foundation of self-reliance economy to compete in Globalization; but also it gradually removes unemployment, uneven competition, economic downfall, capitalistic exploitation, and state's autocracy. This brings equitable (not equal) distribution of social responsibility (labour) and reward (wealth). Hence it takes the society towards divinity. This is Indo-Aryan socialism.

The whole society gradually becomes integrated following the leadership of World Master (Seer) and humanitarian culture slowly gets developed. Finally, an upgraded generation of divine character evolves, by proper 'marriage reform' and popularising natural law of eugenics. This better psychogenic quality of mankind, would make a new world. This is foundation of Aryan World order i.e. 'Divine Global Communism'.

Imparting Industrial-Training is must in Education

The industrial training is the integral part of education and if it is properly given then, that not only makes one self-dependent but also strengthens socio-economy as well as develops scientific temperament and research spirit of the common people.

Under this condition and process house hold industry grows with quality and cheap products. This will not only capture the internal market, but also the global market and will lead the society towards the socialistic system, but securing the human rights. But it requires the government's assistance and sympathy. Students may study arts, science or commerce, but in every faculty some practical industrial-training is compulsory from the very primary stage, so that they can get confidence on its' practical application to maintain themselves after passing the high-school career. The subjects must be classified into such practical industrial divisions, so that through practice with theoretical study they can built their career. Then they will complete their study with such common sense that they would be able to apply the knowledge to earn from the market. This is the

strong foundation of social economy and growth of economic and scientific temperament.

To create scientific and technological base of the society from the primary educational stage of each school, there must be an industrial laboratory. Where children will create toys using the instruments and apply their imaginary thoughts with the help of the teachers. During making the toys they will also be trained in mathematics,

science, geography, history etc. related to those practical works. Thus the small kids will not only imbibe scientific and technological know-how but also develop great interest in their regular subjects because of the entry through their ground of interest. Thus they will automatically search

all the theoretical aspects in their subjects and those will also be stronger.

This is connected to socialistic form of people's economy, where society will not be exploited by capitalists or multinationals and on the other hand people will not be dependent on mercy of state. Money power will be transferred to the common efficient people.

Science Dharma and God : An interconnected phenomenon

Science is the causal expression of natural phenomenon—that gives mathematical and logical analysis of the facts of the events, which take place around us. In the view point of the common people 'Dharma' is mere ritualistic exercises. But rationally it (so-called Dharma) has no direct impact on becoming of human life and it doesn't stand on scientific ground. On the other hand majority of population of the world believe 'God'; but His existence and His impact on human life couldn't be scientifically discovered so far.

So apparently it is a difficult task to keep God, Dharma and Science in a common bracket. But 'Indoaryan Existentialism' (IE) - a revolutionary ideology to be and become of mankind which can balance the total socio-environmental ecology in every parameter; rationally reveals a logical inter-relationship between Science, Dharma and God.

Actually a distorted concept about Dharma and God has become popular among the people. And this is now a 'fear-matter' to them due to grave ignorance! That's why it has lost its connection with human existence. In fact Dharma is those mental and physical activities — which nurture and uphold human existence-n-evolution forever. So who so ever exists and evolves; more or less he or she is following Dharma. But human wants the best path of self-becoming. So he searches out the techniques to be and become and this very

technique is science. So Dharma only welcomes science, to be applied in favour of human existence.

On the other, to know 'God' is to be God; it means to get control over environment in favour of self-existence and obviously it directly varies with existence of surroundings. So having more existential control over environment, makes more realization of God. This quality-of-control does present in every matter in terms of 'existential urge'. This urge of existence only enables it to make command over its existential factors (environment).

As water wants to remain water; and to be so it controls it's environment in favour. Similarly human for its existential urge; - tries to unveil the secrets (factors) of the mechanism of his environment. This develops existential consciousness in human - which connects him with all the universal matters to be used in favour of existence of all.

As total ecology wants to uphold existence of each individual to balance the system. In this state of consciousness, a man can receive impulse from around. This is 'God' realization and the knowledge to make it out is - science. And the practical application of the knowhow for being and becoming of self and all factors of existence - is Dharma. Thus God, Dharma and Science are interrelated!

National & International News

Demonetisation crisis brought digitisation transaction

The motive behind demonetisation of Govt. of India seems to be honest. But

certainly it made a crisis in the small and micro business sectors and common people faced lots of hardship for their daily livelihood activities. But more or less people stood with the effort of combating black money. But on the other hand digital monetary transaction suddenly gained popularity even in the rural sectors. Is it a big leap towards digitisation?

End of life of a revolutionary!

Fidel Castro, a Marxist Communist revolutionary who came to rule Cuba with an iron fist, died on November 25, 2016 at the age of 90. He commonly known as

Fidel Castro, was a Cuban politician and revolutionary against neo-imperialism. He first tried to overthrow General Batista in 1953, was imprisoned, exiled to Mexico, and then returned in 1956. He succeeded on January 1, 1959 and has dominated Cuba ever since - surviving 638 documented attempts by the CIA to kill him, and living through ten US presidencies. He governed the Republic of Cuba (a Marxist-Leninist socialist small island close to USA) as Prime Minister from 1959 to 1976 and then as President from 1976 to 2008.

Noah's Ark found in Turkey?

A team claimed to have found first time in couples of years ago seven large wooden compartments buried at 13,000 feet above sea level, near the peak of Mount Ararat. After that many visited the place. As it is believed according to Bible that the mountain (Ararat) in Turkey is the final resting place of Noah's ark where Noah, his family and animal species after the great flood landed about 7000 years ago. Now it has drawn attention of the historians, anthropologists and also UNESCO.
