### Resolution: Discrete and Divine

The new year 2017 has come with new hopes. Virtually everyone takes resolution in terms of achievement, desire, position, health, money, marriage, or so on. Some of those we keep in our mind, but most of the cases we forget. But in this vast array of resolutions, there is one common factor, and that is - everyone of us wants to lead a happy and better life. This is divine; and those varieties are discrete.

As we see the full moon day, but the rest of the day we see the crescent of the moon, which gradually becomes thinner and one day it transforms into dark i.e. no moon day. And again, it reverses back to full moon. Original moon always remains same forever and that is 'divine'. The rest forms of the moon are 'discrete'.

Similarly, levels of knowledge and consciousness vary from time to time. But when total knowledge comes to our approach, then all past get merged into it. And such situation arrives in the form of the higher peaks of the range of hills of history of mankind, when a man of wisdom takes birth on the earth. He makes a flood of existential-culture over the Globe. In this flood every faculty of knowledge fulfills each other and makes all in one. Such man is called is Divine Seer, who takes all the discreet (each small unit) into Himself and demonstrates to the world - how to achieve total wisdom and happiness.

Thus, our resolutions only take shape if it follows the scientific law of success. This science of success gets manifested in the life of the Man of Science (World Master). As, to understand mother's affection books or lectures don't work much, but if we come within the induction of mother's affection, even a child immediately could realize the gravity of a mother's love.

So the true resolution of man is to get attached with Master Man, if one truly wants to love his own life and growth and enjoy self-existence through generations. Because all varieties of resolutions (discrete wants) meaningfully get solved into that divine unit.

Hence we must find the Man of Wisdom to get the solutions of all material and spiritual quests to enjoy heavenly bliss!

### Cordial conjugal love and future economy

Love is the only cause of human existence. Because love for life-enjoyment and self-expansion drives one to seek knowledge, explore the surroundings, reveal unknown secrets, find out the elixir to combat death, and so on.

The desire of self-expansion of the living-world enables it to get attracted to the opposite sexes, which begets progeny. Thus, the human being also naturally gets attracted towards opposite sexes to fulfill its inner desire of self-expansion and enjoyment of existence generation after generation. And systematic management of this eternal desire for perfect progress welcomes marriage.

So, purpose of Marriage is not only 'a license of sex-enjoyment', but to serve a long term great social purpose too. So, the selection of a marriage of male and female should secure happiness, progress and better progeny. If a selection (marriage) fails to fulfill any of its factors, results disaster of social life and environment. This perfect-selection is called 'psychogenic compatibility' - that is, in fact mental and genetic matching.

Genetic matching comes from heredity and genetic qualities; and psychological (mental) tuning comes from the regardful-love of the female towards the qualities of the male; so by nature female has the first choice of mate -selection placing herself from above her complexes (having psycho-physical purity), because this enables the girl to scan good and bad sides of a boy with a transparent vision to make a right judgment.

Such 'marriage' brings perfect sexual-relation, that removes all sorts of abnormalities and procures better progeny. Couple's love-bond gets perfection with a higher common-attachment (man of 'personified wisdom'). It assures everlasting conjugal love and harmony.

This is the actual cause of foundation of social peace, that welcomes national progress and builds the future economy. Industry (soil of the economy) grows from servicing attitudes towards the environment. Thus, ideal centric conjugal love could make future self-reliance people's-economy and secures continuous flow of higher human resource - the base of a stronger society.

### World News Bulletin

#### 'America has no permanent friends or foes': Trump

Nearly 45 years after the Nixon duo's path-breaking friendship overtures to Mao's China, the world is witnessing another American leader, president-elect Donald Trump, attempting to implement that formula, this time to say that China is no friend of America's but a job-stealer and an enemy. After getting elected, Trump continued his tirade against China, giving enough indications that what he said during the campaign wasn't just poll rhetoric.

#### 'One World Government is needed': Bill Gates

In view of the urgent problems in the world is a global government "badly needed," where "The UN system has failed" - said 59 years old world's richest and founder of Microsoft Bill Gates. "Take the UN, it has been created especially for the security in the world. We are ready for war, because we have taken every precaution. But what

is with epidemics? How many doctors do we have as much planes, tents, what scientists? If there were such a thing as a world government, we would be better prepared."

#### Life in Mars - clue found!

NASA scientists have found brand new evidence of life on Mars in the form of a chemical element that is essential for DNA synthesis announced on 14/12/2016. NASA's Curiosity rover found the chemical element boron on the surface of the red planet - a chemical that is crucial in supporting life. The temperature, pH, and dissolved mineral content of the ground-

water could make it habitable. According to the researcher, rocks containing boron and other elements, could have continued on Mars for hundreds of millions of years. After boron was found on Mars, chances to find there any traces of life increased.

### Jesus Christ : The lover and savior of mankind

It is a fact of more than 2500 years ago. The social order of Europe was almost shattered under wrong dictatorship, nonsense worshipping of idols, absurd practices of rituals and so on.

There was a religious man, Joseph (descendent of the Aryan Prophet Abraham) from Israel, was loved by a pious lady Merry. Jesus Christ took birth within their divine love. Since His childhood Jesus had been very much emotionally attached to His parents. People used to love Him by virtue of His divine love to all.

It is believed (by the researchers worked on His early life and life after the crucifixion) that at the age of fourteen He was taken to Indo-Aryan subcontinent (Bharat) by 'three wise' men (who were following Him since His 'Holy' birth) and He learnt here for 18 year and then went back to His home in Israel. He took initiation (Baptized) to Saint John at the age of thirty. In spiritual realizations Jesus came to know that He is made to save the world from

all causes of sorrow. He moved on to teach His findings with love and humanity along with few fishermen (initial disciples) who became great saints later on.

His life was sacrificed to save humanity from all miseries. His teachings were based on the fundamentals of Aryanism, are: (1) Believe in 'one' God, (2) Accept God's incarnations (Prophet) (3) Path to be and become (one Dharma) are manifested in Prophet. This was an evolution of Aryanism; so Jesus is also treated in the chronology of Aryan Seers.

He was crucified by the cruel King accusing Him as a reactionary! But Jesus was secretly saved by His closest devotee Matthew and treated by Mary Magdalene. It is now proved fact that He went to Indo-Aryan subcontinent (Bharat) after this incident and spent till His last day as Saint Isa. His grave is still kept under the 'Tomb of Rozabal' at Srinagar in Kashmir (India).

TOP: Jesus and the cave of resurrection, here He was treated after crucifixion BELOW: His nailed foot-print & Grave in Kashmir.
