### Aryan Migration

**R**ecently a number of Indian and some foreign social scientists have challenged the prevailing saga of 'Aryan Invasion Theory' in India. They raised couples of major points in favour of their arguments and demanded to re-write the Indian history accordingly. They say that - *Aryans never came to India from outside, rather they moved out from India itself.*

They are presenting a couple of arguments to support this statement, saying 'Aryan Invasion Theory' is a false imposition of the western Historians to make an intellectual pressure over Indians to establish their domination since long past.

To strengthen their stands they say 1. They don't find any genetic evidence of foreign gene mixing with Indians. 2. Excavation of archeological remains of ancient India proves that before the expected time period (around 1500 BC) of their speculation of 'Aryan Invasion', advanced civilization were existing. For example they brought the recent findings of the undersea remains of 5000 years old *Dwaraka* city of Lord Krishna. 3. Recent findings of satellite pictures of drying out of *Saraswati* river about 2500 BC, proves that *Rig Veda* was written about 5000 years ago at *Saraswati* river side.

Now the question is what is the fact? We find the concept of so-called 'new' idea of Aryan's cultural development in India and Aryan Invasion theory in 1500 BC; both were not correct!

The truth of migration (not an invasion) of the Aryans from north through the Ural mountain region of Russia and Caspian sea, to Europe, Asia, Arabs, etc., including India (before 3000 BC) has strong genetic, linguistic, archeological evidences. 1. Russians R1a heplagroup (Aryan's genetic marker) are older than Indo-Aryans. 2. Common root of languages (Sanskrit, Latin, Greek, Estonian, etc.) 3. Existence of ancient archeological and mythological evidences in Russia and central Asia. 4. Descriptions in Vedic literatures, depict about their early locations in central Asia and above North.

So, before 3000 BC Aryans migrated to India from northern global region.

### Secularism : Seeks a rational vision for change

**T**he word 'secularism' is defined in Indian constitution as - 'all religions will be treated equally by the state'. It means - state will not interfere with the religious affairs of any religious sect or community. It is interpreted as each individual is free to keep faith on any religious thought and free to change his/her faith or practice rituals. The state has no concern on individual's personal matters.

There are more countries which are 'not' secular, but state's laws are guided by religious sectarian bi-laws. And definitely other sects or communities are not privileged, rather they are often led a minority life under a socio-political pressure.

Apart from that such rivalry strength are cropping up to capture state's power; and this happening in so-called 'secular' state and the rest of the world. Now this has become a great challenge to the humanity and question is—'shall humanity be survived?'

Actually, there is a great mesh regarding religion, Dharma, sects (community), rituals, belief, faith, institution, etc. During forming of the constitution regarding 'secularism', opinion or teachings of the religious founders were not considered.

Indian or Hindi terminology of 'secularism' is 'धर्मनिरपेक्षता' (*Dharma-nirapekshata*). The greatest confusion comes here and that

becomes the cause of communal conflict Globally. This concept is failing to uncover the common source of all religious ideas, rather it puts an official stamp on the differences of sectarian.

Actually Dharma is always ONE - the science to uphold being and becoming of mankind. So the word *Dharma-nirapeksha* (neutral to all Dharma) becomes meaning-

less. But according to time, and place - paths as given by each Seer for 'one' Dharma varies. Those paths are different sects.

Different prophets came to establish once Dharma, i.e. to uphold the divine truth of Global unity and prosperity; and they are the best World

mass leaders. So they and their mission are same by fulfilling the past Seers. Only our detachment from them ignites the communal conflict.

Thus stands of the states either in the name of 'secularism' or 'religious state', encourage sectarian conflict and become the cause of destroying Dharma.

So, the state should be a सम्प्रदाय निरपेक्ष धार्मिक (*sampradai nirapeksha Dharmik*) i.e. state will follow one Dharma of teachings of humanity of the Seers as past fulfiller, but treat the sects equally to keep those in the stream of one Dharma.

### Is Human Life Pre-destined ?

**D**estiny is defined as the incident, would be happened in coming future. Most of the common people believe in this destine and keep faith in fate. Everyone has an attraction to uncover the mystery of this unknown world!

But what are the reasons of those incidents, which take place in the future? What is the factor of life that sets one's destiny? To find the answers we have to search out the cause-effect relation.

If you take care of your health sincerely, that gives you a healthy future or if one invests money, then his economic destiny gets secured. Similarly, our everyday thought and action step by step set our destiny. This is called प्रारब्ध or *karmafal* or destiny.

But the question is everyone of us wants a better future, happy peaceful life; then why misery, sorrow, unwanted death comes, why

we can't avoid it? Are these pre-decided?

Actually, these are the equal-opposite reactions of the present actions. Most of us are influenced by our inner unknown complexes and we work accordingly. This we get from our pasts (heredity and life-death-life cycle). So by adjusting the inner complexes one not only leads a better life, but also avoids the bad effect of *karmafal* or harmful impact of 'pre-decided' destiny!

Impacts of deadly complexes definitely possible to avoid for future life and lift, by identifying silent actions of inner-complexes. The best technique of identification is - to follow a 'Master Man' with love-bond. Now in the contrast of the Seer one can find out his own weaknesses and rectifies. This turns the 'deadly' destine. So, destiny is changeable in favour of enjoyment of life.

### World News Bulletin

**India offers to temporarily give up veto power for permanent UNSC seat:** While the new permanent members would in principle have veto powers that the current five have, Akbaruddin said, "they shall not exercise the veto until a decision on the matter has been taken in a review".
