Resist, Not evil !!!

How a silly mistake shakes the world for thousands of years and leads a mass to the wrong direction, put them into a great trouble. And nobody could rectify it, unless the Seer man comes again. Versions of Bible is an living example of such sorrow incidence!

In the 'Gospel of Matthew' chapter 5, 39th paragraph of the Bible new testament, we find that Jesus says - "But I say unto you, That ye resist not evil: but whosoever shall smite thee on thy right cheek, turn to him the other also." The English interpretation of this verse is - 'But I tell you, don't resist him who is evil; but whoever strikes you on your right cheek, turn to him the other also'.

This interpretation has made the wrong mindset of the Christian world, which is quite far from the real sayings of Jesus Christ. The 'wrong' message is - all must forgive, even the enemy of humanity. What is the mistake and how was it made? Only missing of a punctuation comma (,) just next to the word "Resist, Not evil..." created a great mesh. The real meaning of the version is - 'If you resist, there will be no evil.' Movement for self-protection from the effects of odds and stopping the person or persons from committing mistakes, is the best path of resistance of sin.

In the Christian world it is believed that - 'you must forgive the sinner, but not the sin'. This also supports the very saying of Jesus. It means that - we must make the man free from his inhuman thinking and activity, which may not only harm others, but the man himself too. That's why the same Jesus took the bold action against the cheating and in the name of religious practice at the Jerusalem Temple site and destroyed business behind the idol worship. But He opened the door of love (of God) for them. He also prayed to forgive them, responsible for 'unknowingly' committing sins for his crucifixion.

Every age, we commit the same 'unknown' mistakes, so present Master says - 'Jesus is still crucified !!!'.

Digitisation and Man Making Education

Digitization is the process of converting text, audio, video, animation, graphics etc. into a common digital platform i.e. into binary (0,1) format or electric impulse. And education is the process of imparting inquisitiveness for exploring existential factors towards becoming of life.

Now it is a big question - does digitization serve the purpose of education; is a digitization compatible to education procedure?

Viewing the direction of progress of world civilization, digitization is becoming an inhabitable factor of the future world. It could be perceived that in the near future - the three pillars of human evolution: **Concentration** (profitable adjustment of passions), **Education** (nourishment of instincts) and **Eugenics** (to gain better genetic potential) are going to be digitized to serve the purpose of

man making education.

The indispensable role of teacher (master or Guru) in man making education is going to depend more and more on digital-engineering to make self-realization and nurture inner potentials through an audio-visual effect.

On the other - human genome (genetic record) is getting digitized and each individual will be given 'Digital-Id' card that holds every detail of an individual,

related to records of any medical deformity, hereditary character, native bent of mind, IQ level, etc. to manage and evolve psychogenic asset of individuals in terms of offspring.

Here most interestingly to protect this human asset, digital matching and approval would be a necessary factor for matrimonial issue of male and female.

Consciousness: The mind-matter relation

Tarun Iyar - a research scholar was working in the Physics lab on electromagnetism. While touching the two ends of a digital voltmeter, he found a sudden deflection on the measurement on its monitor! It made him, amazed to find discharge of electric impulses from his body!

This is an issue of confrontation since long - which comes first, Matter or Mind? Religious people say 'Mind' or spirit comes first. On the other hand, rational and people in the field of science believe that matter is the ultimate factor of existence.

Now various experiments in human body show that - there are a continuous flow of electro-magnetic and thermal radiation from bodies. And in various state of mind, the intensity of the radiation significantly varies.

In fact brain is the most evolved and intelligent matter so far as the creation is concerned. The building block of each matter is tiny atoms - is charged or energy particle. Other words - 'condensed form of energy is matter.' The

ever movement of these energy particles make various frequencies of vibration and the resonance creates its own language.

Similarly the brain, or mind-matter also works and makes frequency of language. It also has the capacity of receiving frequency of language or impulse from around. Conscious is that - which can receive and transmit impulse. Thus the brain's higher power of receiving and transmitting stimulation make it more conscious matter.

So having more power of consciousness, causes more efficiency of receptivity. Researchers now believe that - human consciousness, not only reciprocally communicates among human beings, but also does beyond, with other matters (conscious). Scientists are thinking to catch this energy transmission and project to make it visible.

Systematic spiritual practices remarkably increase the power of consciousness, leads one towards a feeling of oneness to all.

India becoming hub of international arbitration: Chief Justice of India

Chief Justice of India J.S. Khehar on Saturday said India was becoming a hub of international arbitration and the government's initiative to work towards zero interference in the process would promote confidence among foreign traders. Justice Khehar said the potential for international

arbitration was increasing due to foreign investment. Speaking at a two-day seminar 'Engaging Asia Arbitration Summit', the CJI said the government's 'Make in India' scheme will make the country a favoured market.

Trump Administration Asks Indian-American Surgeon General To Step Down:

Vivek Murthy, the first Indian-American appointed by the Obama regime as the Surgeon General, has been dismissed by the Trump administration to bring new leadership to the vital public health sector. Dr. Murthy, 39, has been replaced by his deputy, Rear Admiral Sylvia Trent-Adams. Murthy, the leader of the US Public Health Service Commissioned Corps, was asked to resign from his duties as Surgeon General after assisting in a smooth transition into the new Trump administration," the US Department of Health and Human Services said in a statement.

Xiaomi Mi 6 Launched: How Xiaomi Flagships Have Evolved Over the Years:

Xiaomi has unveiled the sixth-generation of its flagship smartphone, the Xiaomi Mi 6. The all-new smartphone and its ceramic avatar, the Mi 6 Ceramic, have been announced for the Chinese market but are likely to launch in other markets including India in the coming months. Xiaomi Founder and CEO Lei Jun at the launch event on Wednesday talked about it.
