

# THE INDOARYAN EXISTENTIALISM

Vol-4 | Issue 2 | September 15, 2020

We dream of a Divine Global Order -the World United States (WUS) by making India a 'Global Teacher'!

Inspired by Indo-Aryanisation, - is an ancient discovery of the natural laws of human evolution to balance Socio Environmental Ecology (SEE) of modern civilisation, with a realisation of 'oneness' to all.

**PenUp**

## Global Leadership

**L**eadership word is often used in the political arena or in corporate sectors, who lead an organisation. But it has a wider horizon. He is a leader who serves to protect, nurture, and uphold people's existence as an oneness feeling.

Such natural leaders are not elected but selected by the people. For example Jesus Christ. Why was he accepted by a large number of the World people? Because he had a feeling of the same 'oneness'. He realised, everyone's existence is his own existence. So he was desperate to reach out to the people. This was his 'self-interest'. But an elected 'leader' has some 'other' self-interest!

## The 'Master' of Masters

**H**uman history often encountered a self-made existential crisis. And the cause of that crisis was their ignorance about the science of life and lift. Though man struggled to overcome it by trial and error methods and somehow got success. But again it repeated in a newer form.

But simultaneously time to time we get some great (the greatest) Masters who irrespective of varieties in mankind uniquely teach us to root out the root cause of all sorts of crisis, which is germinated within a human, - the dis-ordered complexes.

Sree Sree Anukulchandra was also one of such Masters in this century. 133 years ago (Sept. 14, 1888) He was born, and served mankind till January 26, 1969.

The uniqueness of His teachings was - acknowledging the past Prophets (those are the best world leaders too), one should

accept the present to learn the technique of life and growth. Their path is to uphold human existence in respective times, that is Dharma, and it is one.

He says - one may not accept 'God' but if he believes his life, then he embraces the laws of life out of the urge of existence. This 'existential urge' is in fact,

God. So God is also one and this urge is present in every matter, so God too.

The most dynamic

aspect of His lessons is total amalgamation of Science and Dharma, togetherness of Materialism and Spiritualism, that makes Him the Master of the Masters of this age.

His mission is Man Making Mission, the transformation of man's Psycho-genic existence into it's highest form. It enables the consciousness of the individual, which would secure the inner urge towards the total evolution of self and global society.

## World Master's Message

*"Compromise of common interest is the comrade of misery."*
