

# THE INDOARYAN EXISTENTIALISM

Vol-5 | Issue 1 | May 1, 2021

**We dream of a Divine Global Order -the World United States (WUS) by making India a 'Global Teacher'!**

Inspired by Indo-Aryanisation, - is an ancient discovery of the natural laws of human evolution to balance Socio Environmental Ecology (SEE) of modern civilisation, with a realisation of 'oneness' to all.

**PenUp**

## **Eugenics & Evolution..!**

**E**ugenics means "well-born". In 1883, Sir Francis Galton an UK scholar first described the word as genetic improvement of human.

Eugenics was popular in America during 1921, but earned its negative association by Nazi's attempts (30's) in the name of 'Aryan race' and it was rejected.

We must know that nature has inherited the law of eugenics since creation, and we must learn from there. In Indo-Aryan culture it was cultivated since ancient past and was applied in marriage system with a purpose of qualitative evolution - is the key factor of total human progress.

However it is back in terms of 'genetic engineering' and ethically offers hope for treating genetic illnesses, but it needs to be applied rationally in social life.

## **Leadership in personal to political life**

**L**eadership doesn't only need in nation's politics, but more of that it is a must for each individual life. psychology says- unless one gets mentally attached to a psychologist, he can't overcome his psychological disorder.

In modern days, people are educated, intellectual and intelligent. So often they think that - 'we are self-sufficient to realize what is to be done or not'. Accepting or surrendering to a 'man' or 'master' is not needed.

They could gather information from many natural resources, as nature is the best teacher.

It's very true that - 'nature is the best teacher'. Nature teaches us that a universal system is moving around a big star or sun to keep its existence. Ignoring centripetal force towards the central star, it would die. A tiny cell is tied with its' center nucleus, becomes a cause of its existence.

In the course of social evolution at the primitive age man instinctively accepted leader for a better survival strategy. Human

In a family, attachment of the wife towards her husband, gives peaceful co-existence in conjugal life and that also procures qualitatively better offspring.

Similarly, the mental attachment of the children towards their parents and teachers develops more merit with character.

Hence, emotional attachment to the best master (fulfiller-the-best), opens the windows of wisdom and shows the path of life with adjustment of inner complexes. 'Complexes' as ignorance come between us and our success. The attachment process is technically called 'initiation'.

So, superior-attachment is the only way of self-becoming and socio-economical progress.

### **World Master's Message**

***"Do not excite the need of luxury in a man;  
Excite his love for the principle."***
