A new born baby's cry announces that - he wants to be acquainted with his environment. He desires to search inherent relationship with his surroundings. Virtually through this inner instinctive feeling of 'oneness' he aspires to secure his existence. Eventually he wants to evolve his stay and feels his existence, with the reference of realization of existence of every matter of this whole creation around him; since, he is also one of the most conscious units of the total evolution of the creation. Now, he finds ultimate shelter of his immediate existence in his mother's heart, and in the very moment that (mother's affectionate embracing) becomes his extreme world of existence. So, he holds his mother as his own extension. This intrinsic 'attachment' is the existential approach to life - which is called 'libido'. Attachment with the existential shelter - is a universal demand of life including human being; - because it is blended with the law of evolution, making close bonding within each matter, since creation.

My integral connection...

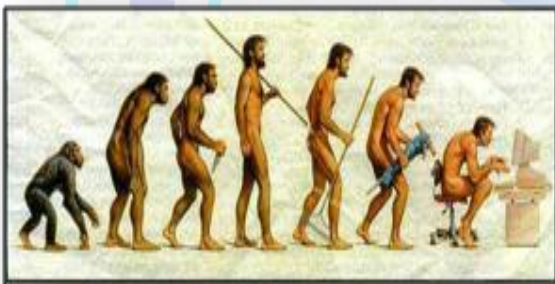

The very next moment of creation, energy got condensed into mass and then mass into matter - the galaxies, stars, planets and earth. Long series of evolution of material reactions (chemical) over the earth, converted into conscious matter (life) that enables to transmit and receive impulse. And lastly in the progression of life we appeared in the name of human being. Only this animal - 'human', can think rationally. Only he has the capability to realize his

integrated relationship with the whole creation; and from that understanding he also controls and manipulates the environment in favour of his existence and becoming.

In every moment of this progress of life, our consciousness is getting evolved by different incoming stimulations from surroundings and existential-conflicts with the environment. This significant acquired bio-cultural quality (consciousness) is passing through generations and becoming hereditary-quality. In different stratum of this human consciousness, there are few men, who are unconsciously supreme-conscious about this mechanism of total evolution

and effectively possessing the competence of controlling the environment in favour of becoming of humanity. That very contemporary 'seer-man' irrespective of any creed, colour, country, time, space, becomes great shelter of humanity, center of love of the people, inspiration of joy of life and true pathfinder of self-realization to lead each entity of the globe, fulfilling according to individual's distinctiveness. So often they are called by many people as - son of God, messenger of Almighty, love lord, fulfiller the best, seer, pathfinder, etc. In fact they are true leaders of mankind and humanity, as they really influence the world mass for longer period of time in terms of becoming of life and it is continued of their advent one after another by fulfilling the pasts. There is no magic or miracle in this regard, except the technique of upholding of existence and best fulfillment of humanity.

World history is the eye witness of these series of socio-cultural evolution of mankind towards better prosperity for all round development and progress along with peace in life.

I'm evolving...

Man's keenness of searching of the best way of existence and becoming makes him psychophysically adjusted - which gives birth of the people's leaders or world seers like - Sree Krishna , Buddha , Jesus , Mohamed , Sree Chaitanya , Sree Ramakrishna, etc.

Apart from them different humanitarian thinkers since ancient times to modern time like Aristotle, Confucius, Vedic rishis (like seven rishis - Atri, Bharadwaja, Gautama, Jamadagni, Kasyapa, Vasishtha, Viswamitra), Adi Sankara, Chanakya, Kabir, Ramanujan, Newton, Darwin, Einstein, Karl Marx, Swami Vivekananda, Rabindranath, etc imparted education to virtually uphold different sections of teachings of those Seers. We need the accumulation of these teachings and knowledge as the inter-fulfilling idea to each other for better application in the contemporary age and time according to our own conditions. Our research work has found the fact of science of being and becoming of mankind after studying the life and teachings of the world seers and thinkers.

But even though there are so many quests of life of man about the - true path of happiness-peace-bliss, connections of cause and effect, relations of one's past-present-future, reality of spiritual materialism and material spiritualism, techniques of mastering over human complexes and total enjoyment of life, application of the natural law of evolution in bio-psyhic (total human potentials) development, realization of integral relationship of self with universal law of nature through psycho-spiritual evolution, interrelation of life-death-resurrection, the mechanism of ecological balance of man-society-universal environment, relations of society-politics-economy with human's divine qualitative development, inter-fulfilling characters of the past world seers, relationship of humanity and unity to be transformed into new world order, and so on. Man thinks -

What are these? Why are these? How are these? How could it serve my life and growth and becomes the cause of happiness forever? Who am I and how am I related with?

Can I realize 'oneness' with the whole...?

When man finds a right path out of his 'instinctive-attachment' with the latest conscious seer-man who rationally reveals the reality of these quests of life, then he initiates to discover his integral relationship with the mechanism of the whole system. That normally makes him truly attached with, and finally he gets evolved through making solutions of his quest of life.

There are two pathways to find the solutions: intellectual and spiritual. The scientific analysis that finds the cause-n-effect relations of the event is - **intellectual process**. And evolving the inner mechanism of mind and nervous system to realize the universal mechanism of the inter-relationships is - **spiritual practice**. Both the cases - right guidance of the realized master man is indispensable.

Recently what we are getting - all those thoughts of the past seers and thinkers have been marvelously materialized in the life and teachings of one of the recent world humanitarian masters Sree Sree Anukulchandra (1888-1969). On the basis of this revelation, all fulfilling

evolved concept of integral philosophy of life has been appearing in the name of 'Indoaryan Existentialism'. It advocates of the right balance of both spiritual and intellectual techniques, to realize the mystery of existential-becoming of human with the whole environment. Sree Sree Anukulchandra - who is presently followed by millions of the people of different sects and beliefs in the world as 'Guru' or

path-finder of life; he has scientifically updated the world thoughts which are founded on the observations of the facts of existential-becoming of humanity and also viewed by the Aryan seers of thousands of years including Buddha, Jesus, Mohamed, etc and other people's thinkers. Here we must underline very categorically that - WE ARE CONSCIOUSLY NOT

The future world is mine...

AT ALL FOCUSING ON ANY PERTICULAR THOUGHT OR IDEA, RATHER OPENLY RELEASING THE FACTS WE FOUND TILL NOW (MORE RESEARCH WORK IS GOING ON) AS INTERFULFILLING SCIENTIFIC CLUES FOR THEM, WHO HONESTLY SEEK THE LESSONS OF TOTAL SPIRITUAL SELF-EVLEVATION AND RIGHT MATERIAL PATYWAY OF EVOLVING WORLD ORDER TO SET A FUTURE DIVINE GLOBAL SOCIETY.

In this course we have put teachings of life of the past world masters, followed by the introductory life sketch of Sree Sree Anukulchandra - one of the latest world teachers; to understand the lessons of the past seers who are the fulfiller of their own pasts. We have considered Sree Sree Anukulchandra here only because his all-embracing life and teachings spontaneously made him as a PATHFINDER of the new thought 'Indoaryan Existentialism'. So it (even saying of his life & teachings) does not seem to be a mare school of thought or any sectarian or communal idea, but according to our findings this (SQL lessons of Indoaryan Existentialism) is an indispensable science of life that dynamically upholds the future universal existentialism.

Research works (PhD awarded) on the relevance of this ideology in the modern world has already been approved by PG Department of Sociology, Ranchi University (under University Grant Commission i.e. UGC of India) and New York University of USA; and more such

excellent works are going on. On account of self-realization, secret path of success, universal bliss, humanity, bio-psyche and psycho-spiritual evolution of human being, divine communism, materialism of spirituality, consciousness of self-identification with creation, oneness feeling with the totality, understanding the mechanism of socio-environmental ecology; - the lessons of Self Quest of Life (SQL) is offering in the view of development of consciousness of being and becoming of all sections of the people presently in two levels i.e. **Fundamental (SQL-I)** and **Advance (SQL-II)** along with various HRM **Contact class programs** and upcoming HR course modules. Purpose is - to reveal the facts of life and growth, so that they can motivate themselves to become the meaningful right follower of their own respective beliefs and traditions in the contemporary age, to achieve the common goal of everyone's life - i.e. 'existential becoming'. Certainly, this will perform an effective role to build up universal consciousness and could bind everyone with togetherness under the movement of Man Making Mission (3M), - a silent world revolution. Let's take a chance.....

Purpose of SQL lessons of 'Indoaryan-Existentialism':

The 'Self Quest of Life' (SQL) course modules have been structured in the frame of Human Resource Management. The inner purpose of the lessons of SQL is to develop consciousness to - Conserve the balance of evolving socio-environmental ecology and to realize the oneness-feeling blended with the ever changing whole ecological mechanism by psycho-sexual attachment with One... If we observe the total evolution since the moment of creation - it was the evolution of energy, chemical and then biological, and lastly man evolved along with the gradual expansion of the universe. Man - who has having the superior conscious matter - the mind!

I can know...
Who am I?
What for I've been made?

This mind-matter has the capability to realize and reveal the total history of evolution that is already inherent within itself, like any matter. This human-realization carries him back to his origin - the first matter, from where everything was created. Then naturally he can sense every individual of the creation as his own image and spontaneously develops universal

brotherhood. Under this realization one does get oneness-feeling with the whole creation, as man himself is the most evolved conscious-matter of this creation and his reforming acts upholds the existence of the total system. Spiritual point of view this comprehension is called - 'God realization' or *Bramha darsan*, and realized spiritual man says - "I am He". So "He" is one, path of realization is one and lessons of the seers (realized men) are also one.

To attain this supreme oneness-realization, the latest technique of spiritual practice (psycho-physical exercise) is necessary. But along with this building up qualitative human being, it is also indispensable to organize favourable socio-cultural, socio-economic and socio-political conditions understanding and following the law of nature's evolution. So, it is must to cultivate the culture of elevated-intellectualism. Thus, quality human gets natural oneness-realization; it means they are integrated with the greater world on the ground of each individual's own native bio-psyhic bent. Then modification of the people's cultural heritage and rationalization of his traditional belief under the right leadership of fore-seer(s), will be evolved into divine communism as the primary stage of ultimate realization, a new world order - the World United States (WUS).

I'm looking for an ultimate shelter...

Objectives of SQL-I (Fundamental) HR lessons to understand:

- The origin of the thought of Human existence and becoming in terms of HRM.
- The teachings of the past world masters as background of Indoaryanism.
- Life and teachings of the pathfinder of existential-becoming.
- Fundamentals of 'Indoaryan Existentialism' - a path of total human evolution.
- Understanding the self psycho-disorder as the main barrier of success of life,
- The secret of human's psycho-spiritual development.
- The mechanism of Man Making Mission (3M) towards divine world order (WUS).

Objectives of SQL-II (Advance) HR lessons to understand:

- The all fulfilling ideology of integral relationship with the total socio-universal ecological mechanism along with self-realization and energizing body and mind.
- The universal law of nature's evolution and its' relation with human existence.
- The grouping of similar instinctive qualities and socio-economic evolution.
- Aryanism - the scientific laws of existential-becoming of human civilization.
- Biological, psychological and spiritual evolution of individuals by 'libido and eugenics'.
- The all merging single path for individual, conjugal and social becoming, towards divine communism - a global society of upholding humanity.
- Technique of re-adjustment of passions to find bliss, joy and success of life.
- Understanding the secrets of - life, death and resurrection.
- Spiritualism of materialism and materialism of spiritualism.
- Revelation of the latest and easiest pathway to achieve supreme consciousness and realization of 'oneness' with totality, - the world ever got.

Objectives of other SQL lessons & HR contact classes to get:

- Learning of scientific technique of meditation to have feelings of self-existence.
- Psycho-analysis of introspection and self-realization.
- Accumulate of knowledge of faculties of sciences, social sciences and humanities.
- Find relation in between different branches of knowledge for existence
- Building character that makes efficiency.
- Know the technique of growing concentration in studies of students.
- Develop self-confidence, self-expression, concentration, creativity and memory.
- To be happy and successful conjugal life.
- Know the way of psycho-sexual manipulation for getting better child.
- Understand the behavioural aspects at home to impart good conducts to our children.
- Get the way to be free from tension and stress.
- Have cheerful and enjoyable working spirit by solving your personal problems.
- Finding the root cause of the problem and psycho-disorder to realize inner potentials.
